Less tire wear and ground damage

Enhanced operator comfort through articulation and oscillation

Bridging the gap between skid steer loaders and larger wheel loads

Safe and ergonomic operator station with side entry

Higher lift heights and higher tipping loads compared to service weight

The GiANT G2700HD compact articulating wheel loader is powered by a Kubota 50 HP, 3-cylinder, turbo diesel engine. A diesel oxidation catalyst (DOC) and diesel particulate filter (DPF) aid the engine to achieve Stage V emission compliance, the cleanest in the industry! This machine is available in two boom configurations, X-Tra and Z-Bar, both utilizing the standard skid steer quick attach plate (SSQA). The G2700 also comes standard with a 2-speed gearbox, limited slip differentials and electric locking differentials for the HD PLUS model. Planetary final drives deliver torque to the ground and achieve impressive top speeds of 15.5mph - 18mph (depending on model). This machine is available open station, deluxe ROPS or with full cab and heat, all offering a safe and ergonomic work environment. In addition, the G2700 frame is equipped with an oscillation joint, helping to improve ride quality and limit ground pressure. A few of the available options include tire profiles for various terrains, road lights for safe travel, 21gpm hydraulic flow, pro-inching and boom suspension. The G2700 has the power and efficiency to comfortably operate in the agriculture, construction, landscaping and snow removal industries.
